

YELLOW LIGHT POLICY

- 1) On approach to an intersection with a light, if the light turns yellow, all bikes stop.

- 2) If the light turns from green to yellow while the first few bikes are already into the intersection, those bikes are to proceed thru and clear the intersection. The bikes not in the intersection yet are to stop on the yellow, not try to accelerate thru. The bikes who passed thru the intersection will turn on flashers and wait at the next safe place to stop.

- 3) Use common sense, don't lock up brakes trying to stop hard. Be prepared to stop ANYTIME you are approaching an intersection, whether you are the first bike or last.

- 4) As always, ***NEVER TURN RIGHT ON RED!***
